**Clinical Grand Round**

**Date : 08.07.2023**  
**Day : Saturday**

**Time : 03:30 PM – 04:30 PM**  
**Venue: Auditorium (above HLTs)**

**Topic: Finding the Zebra among the horses -Rare presentation of a common disease**

**Abstract:**

Neurological disorders have myriad clinical presentations. A diagnostic search often reveals isolated involvement of the Nervous System but sometimes one finds an underlying systemic illness masquerading as a Neurological disease. It's the latter which can be devastating as the clinician is challenged with various organ systems proceeding from a state of harmony to that of absolute chaos.

We present a case of a 46 year old female who presented to us with acute onset ascending quadriparesis which rendered her bed ridden within 5 days. What looked like a common case of Guillain-Barre Syndrome, evolved rapidly into a rare presentation of a common disorder of "Vasculitis induced Mononeuritis Multiplex with multi-organ dysfunction". This case is a grim reminder to all clinicians especially in the era of superspecialisation, to beware of the tunnel vision focusing only on their area of expertise and missing the big picture. The rule of thumb being, keep digging till you can explain the "why" and "how" behind the patient's illness.
