Date: 31.12.2025

**Clinical Grand Round**

**Date : 03.01.2026**  
**Day : Saturday**

**Time: 08:30 AM – 09:30 AM**  
**Venue: Adi-Kailash Auditorium**  
**(Near - Emergency Building)**

**First 10-minute Topic:** “Metastatic brain disease- Clinical, radiological and surgical nuances”

**Presenter:** Dr. Sanyal Sumbul Rana, M.Ch Neurosurgery Resident-II  
Department of Neurosurgery

**Topic:** “Solitary Brain Lesion in a Breast Cancer Survivor: Metastasis or Second Primary?”

**Moderator:** Dr. (Prof) Vipul Nautiyal, Professor and Head, Dept. Radiation Oncology

**Abstract:**

The occurrence of a solitary brain lesion in a patient with a remote history of breast carcinoma presents a diagnostic and therapeutic challenge. Brain metastases from breast cancer usually arise within 2-5 years of diagnosis, often alongside systemic disease. Differentiating primary brain tumor from metastatic disease is crucial, as management strategies diverge significantly.

Radiological features may suggest metastasis versus primary tumor but overlaps often limit certainty. Histopathological confirmation remains the gold standard. Immunohistochemistry and molecular profiling are particularly valuable, as metastatic breast carcinoma and primary CNS tumors demonstrate distinct molecular signatures.

The paradigm shift has significantly influenced all domains of oncological care specially the advanced in molecular testing. Neurosurgical excision remains an option in carefully selected cases, particularly in this case where tissue diagnosis is essential or when mass effect causes significant symptoms. For metastatic recurrence, stereotactic radiation therapy (SRT) has become the preferred local treatment especially in absence of systemic diseases elsewhere. SRT delivers highly focused, ablative doses of radiation to the brain lesion while sparing surrounding normal brain tissue. It offers excellent local control, minimal invasiveness, and rapid recovery compared to surgery. Importantly, SRT can be repeated for new lesions, making it well suited for patients with oligometastatic disease.

This scenario underscores the importance of multidisciplinary collaboration. This has facilitated treatment de-escalation in low-risk patients and intensification in biologically aggressive disease.

**Programme for CGR**

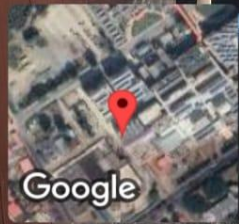

Topic	Speaker	Duration
<b>Introduction</b>	Dr. (Prof) Vipul Nautiyal, Professor and Head Department of Radiation Oncology	05 min
<b>Case Presentation (Neurosurgery)</b>	Dr. Sanyal Rana, (Senior Resident)	05 min
<b>Case Presentation (Pathology)</b>	Dr. Vagisha Garg, (Junior Resident)	05 min
<b>Case Presentation (Radiation Oncology)</b>	Dr. Luckshay Sharma, (Junior Resident)	10 min
<b>Discussion</b>	Dr. Viney Kumar, (Associate Professor) Department of Radiation Oncology	10 min
<b>Question &amp; Answer session</b>	Dr. (Prof) Vipul Nautiyal, Dr. Viney Kumar, Dr. Mansi Barthwal Dr. Anmol Mahani	15 min

All Faculty & Post Graduate Residents are required to attend the Clinical Grand Round.
