Welcome Message

State Conference on Radiology and Imaging (RICON-24) at Himalayan institute strives to serve all those engaged in the discipline of Radiology and Imaging as an avenue for growth and community-building. The organizers of the Conference (RICON-24) are of the firm belief that in order to play an active part in the progress of Radiology the key is to foster its spirit of community. This is exactly why apart from knowledge-dissemination events solely aimed at propagating the latest expertise and know-how, the Conference will also feature numerous networking and socializing events where participants will get to engage with their peers, get advice from keynote speakers and other presenter's questions, and rub shoulders with the academic elite in their respective specializations.

Tackling the challenges today with workable and modern solutions is the most pressing need of the hour. That is precisely why, every single lecture, presentation, and event that will take place during the (RICON -24) will be delivered by experts in the field of "Neuroradiology and Fetal Radiology".

All those engaged either directly or indirectly in the discipline of Radiology and Imaging will benefit greatly from enrolling themselves. They will also get access via a variety of networking sessions and avenues that will facilitate their career growth.
